Not illustrated. 1871 Excerpt: . . . in ships laden with coal than in heaps of that mineral placed upon the ground of the same cubical measure. Jambs Bastn. ( . ) It is caused by the decomposition of iron pyrites which ought to be separated and taken out before the coals are shipped. John R. Liddell. 2nd Question. --Why does one ship burn from that cause and dozens of others laden from the same pit at nearly the same time arrive safely at their destination Answers. (a. ) Some cargoes may contain more sulphur than others and salt water may get amongst the coals during the voyage. Thos. E. Forstek. (6. ) So far as the coal itself is concerned, there cannot be any great difference in the quality of that raised from any one pit or coal seam from day to day, except in the care taken to pick out all the...
